E-COLLEGE SERVICES

The E-College Unit within SVGCC is responsible for all of the technological services offered by the college. The major services provided for students include:

1. The college's website. This can be accessed at www.svgcc.vc
2. The college's Email Service. Each student is provided with a college email address. **Your new email address and password will be sent to your personal email inbox as soon as your registration is completed.** Our Email system utilises "Google Apps for Education" so you will log in from the regular Google sign-in webpage [mail.google.com]. It is extremely important that you can access your college's email account because it will be tied with other services within the institution.
3. SVGCC Learning Management System (LMS). On this site your lecturers will provide supportive teaching and learning materials for the courses that you will pursue. This site can be accessed at elearning.svgcc.vc. Your username will be your Student ID Number and your password will be sent to your personal email inbox as soon as your registration is completed. On this site you will be enrolled in a course that will introduce you to the LMS.
4. Your Student Portal -- This is the system that you will need to log into for accessing your Grades at the end of the semesters. The site can be accessed at my.svgcc.vc. Your log-in information will be sent to your college's email later in the semester.

We in the E-College believe that your learning here at SVGCC can be greatly enhanced by the good use of ICTs. For any assistance that you might need, feel free to contact us via email at studentsupport@svgcc.vc
